	Document ID	Title
1	US 5973696 A	Embedded web server
2	US 5956487 A	Embedding web access mechanism in an appliance for user interface functions including a web server and web browser
3	US 5872919 A	Computer communication network having a packet processor with an execution unit which is variably configured from a programmable state machine and logic
4	US 5805442 A	Distributed interface architecture for programmable industrial control systems
5	US 5734831 A	System for configuring and remotely administering a unix computer over a network
6	US 5727170 A	User defined port and protocol scheme for a programmable logic controller
7	US 5699350 A	Reconfiguration of protocol stacks and/or frame type assignments in a network interface device
8	US 5625781 A	Itinerary list for interfaces
9	US 5623652 A	Method and apparatus for searching for information in a network and for controlling the display of searchable information on display devices in the network
10	US 5613115 A	Method for using PLC programming information to generate secondary functions such as diagnostics and operator interface
11	US 5598536 A	Apparatus and method for providing remote users with the same unique IP address upon each network access
12	US 5420977 A	Multiple aspect operator interface for displaying fault diagnostics results in intelligent process control systems
13	US 5406473 A	Programmable controller
14	US 5321829 A	Graphical interfaces for monitoring ladder logic programs
15	US 5307463 A	Programmable controller communication module
16	US 5297257 A	Distributing a real-time control program to a plurality of input/output nodes
17	US 5251302 A	Network interface board having memory mapped mailbox registers including alarm registers for storing prioritized alarm messages from programmable logic controllers
18	US 5245704 A	System for sharing data between microprocessor based devices
19	US 5225974 A	Programmable controller processor with an intelligent functional module interface
20	US 5159673 A	Apparatus for networking programmable logic controllers to host computers
21	US 5157595 A	Distributed logic control system and method
22	US 5151896 A	Modular digital telephone system with fully distributed local switching and control

	Current OR	Inventor

	Document ID	Title
23	US 5131092 A	Communication system enabling programmable logic controllers access to host computer tasks and host computer access to programmable logic controllers without polling
24	US 5122948 A	Remote terminal industrial control communication system
25	US 5072412 A	User interface with multiple workspaces for sharing display system objects
26	US 5012402 A	System for modifying a machine's program at a remote location
27	US 4953074 A	Function-distributed control apparatus
28	US 4937777 A	Programmable controller with multiple task processors
29	US 4319338 A	Industrial communications network with mastership determined by need

	Current OR	Inventor
